

Strategy Overview

The Cambria Global Momentum ETF (GMOM) utilizes a quantitative approach to actively manage a diversified portfolio of global asset classes. Global Momentum is a long-term trend following strategy with strict risk management methods that are completely systematic.

Research performed by Cambria and set forth in Meb Faber's white paper *A Quantitative Approach to Tactical Asset Allocation* (Second published in 2006 and then updated in 2013) shows that historically, sorting assets based on trailing measures of momentum and trend has led to outperformance.

Fund Description

The Cambria Global Momentum ETF (GMOM) seeks to preserve and grow capital from investments in the U.S. and foreign equity, fixed income, commodity and currency markets, independent of market direction. The Fund intends to target investing in the top 33% of a target universe of approximately 50 ETFs based on measures of trailing momentum and trend. The portfolio begins with a universe of assets consisting of domestic and foreign stocks, bonds, real estate, commodities and currencies. As of December 31, 2025, the Fund was invested 83.1% in Equities, 0% in Fixed Income, 16.9% in Commodities, and 0% in Alternatives.

Returns for periods greater than one year are annualized. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Market price returns are based upon the midpoint of the bid/ask spread at 4:00 Eastern Time and do not represent the returns you would receive if you traded shares at other times. For performance data current to the most recent month end, please call 855-383-4636 (ETF INFO) or visit www.cambriafunds.com. Index returns are for illustrative purposes only and do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index.

Top 10 Holdings as of March 31, 2026

Holdings and allocations are subject to risks and to change.

Cambria Investment Management, LP, based in Los Angeles, California, is a SEC registered investment management firm employing a disciplined multi-asset, global quantitative research process. Cambria provides investment management services through a number of portfolio strategies to high net worth individuals and institutions through exchange traded funds, separately managed accounts and private funds. Cambria believes that any single style or approach that relies on subjective methods can be inconsistent over time, may bias the investment process, and potentially hinder performance. Global diversification through asset allocation, coupled with prudent risk management, is the foundation of Cambria's investment philosophy.

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expense before investing. This and other information can be found in the Fund's full and summary prospectus which may be obtained by calling 855-383-4636 (ETF INFO) or visiting our website at www.cambriafunds.com. Read the prospectus carefully before investing or sending money.

The Cambria ETFs are distributed by ALPS Distributors Inc., 1290 Broadway, Suite 1000, Denver, CO 80203, which is not affiliated with Cambria Investment Management, LP, the Investment Adviser for the Fund.

ETFs are subject to commission costs each time a "buy" or "sell" is executed. Depending on the amount of trading activity, the low costs of ETFs may be outweighed by commissions and related trading costs.

The risks of investing in securities of ETFs, ETPs and investment companies typically reflect the risks of the types of instruments in which the underlying ETF, ETP or investment company invests. In addition, with such investments, the Fund bears its proportionate share of the fees and expenses of the underlying entity. As a result, the Fund's operating expenses may be higher and performance may be lower.

There is no guarantee that the Fund will achieve its investment goal. Investing involves risk, including the possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from social, economic, or political instability in other nations. These risks are especially high in emerging markets. Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise. Investments in commodities are subject to higher volatility than more traditional investments. The fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses. The use of leverage by the fund managers may accelerate the velocity of potential losses. The Fund employs a "momentum" style of investing that emphasizes investing in securities that have had higher recent price performance compared to other securities. This style of investing is subject to the risk that these securities may be more volatile than a broad cross-section of securities or that the returns on securities that have previously exhibited price momentum are less than returns on other styles of investing or the overall stock market. Diversification may not protect against market loss. There is no guarantee dividends will be paid.

The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will produce the intended results and no guarantee that the Fund will achieve its investment objective. This could result in the Fund's underperformance compared to other funds with similar investment objectives.

There are special risks associated with margin investing. As with stocks, you may be called upon to deposit additional cash or securities if your account equity declines. S&P's Balanced Equity and Bond Index Series is comprised of three multi-asset class indices, each with a particular risk level. The indices consist of U.S. Treasury Bonds and Equities with the following asset mix proportions: Conservative: 75% Treasuries / 25% Equities, Moderate: 50% Treasuries / 50% Equities, Growth: 25% Treasuries / 75% Equities.

Indicative value (iNAV) is a measure of the intraday net asset value (NAV) of an investment. It is reported approximately every 15 seconds giving investors a measure of the value of the investment throughout the day.

Index returns are for illustrative purposes only and do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index.
